

BLAST DELAY

The screenshot shows the BLASTDELAY software interface. At the top left is the logo and the name "BLASTDELAY". A menu icon is at the top right. Below the title bar is a green bar chart representing a frequency spectrum. Underneath the chart is a control bar with "param FEEDBACK", "speed x1", "clear" (trash icon), and "recall" (left arrow icon). Below this are two waveform displays: a blue one on top and a red one on the bottom. The bottom section contains five knobs for "DRY/WET", "VOLUME", "TIME", "FEEDBACK", and "FILTER". Below the knobs are five checkboxes: "SYNC" (checked), "PINGPONG", "FREEZE", "POLARITY", and "PITCH".

Parameter	Value
DRY/WET	100% / 100%
VOLUME	-2.499 dB
TIME	1/8 BAR
FEEDBACK	25 %
FILTER	0%

Checkboxes: SYNC (checked), PINGPONG, FREEZE, POLARITY, PITCH

Unlock Process

1. Go to <https://www.audioblast.me/download/>
2. Download the installer for your OS.
3. Once you've downloaded the installer, install the plugin.
4. When ready, please unlock the plugin with your username (email) and serial you should receive by email after registering product.

The first time you launch the Blast Delay in your DAW the settings view of the Blast Delay appears.

Enter your username and the serial you received by e-mail then press Return.

Username=email

Be caferul to copy paste without any space before or after.

Untill the VST is unlocked you will have no sound!

Note: Logic and Garage Band users must press "Return" or "Enter" key on the keyboard after pasting on each textfield.
